Mr. Lee Feurst
Engineering Division
Department of the Army
Kansas City District Corps of
Engineers
700 Federal Building
Kansas City, Missouri 64106-2896

Re: LOOW RI

Dear Mr. Feurst:

As I promised, enclosed are copies of internal EPA memorandum and letters concerning the determination of contaminated soils and groundwater as RCRA hazardous. These should help you in applying it to the feasibility study which the Corps is preparing to do.

I suggest after reading the enclosed if you have any questions, call the RCRA hotline number at 1-(FTS or 800)-424-0396. In addition, it should be noted that the state (NYSDEC, in this case) may have more stringent standards than EPA and you should contact that office also.

Also I am trying to dig where that "sampling" data is from the Syms lagoon that EPA staff conducted; I'll keep you informed.

Thanks again for chairing what I though was a very productive meeting.

Sincerely yours,

Ted Gabel, Hydrologist
New York Hazardous Waste Compliance Section
